

If the NAB wants to keep a handle on the local markets then this would force them to improve the quality of their services. As far as I am concerned competition just makes the service that much better for the consumer, so don't look to me or other educated listeners to back this initiative...why? So the money mongers can continue to line their pockets while the consumer continues to suffer with poor quality of service. We live in a service based society and the quality of service in this society is on a continuous downgrade that shows no sign of stopping. Problems like this start at the top and this is a perfect example of it. They care what quality of service they are giving the consumer...as long as it doesn't effect their pocketbooks. I SAY NO TO PETITION 04-160.
